# Citrix SD-WAN WANOP

The Citrix SD-WAN WAN Optimization edition (WANOP) provides WAN Optimization capability. It supports application acceleration, data reduction and protocol control to optimize applications across the WAN. Optionally, it can include virtual Windows Server to simplify branch infrastructure and mobile PC plug-in capability.

## NOTE

All references to the term "CloudBridge" is applicable to the new product term "Citrix SD-WAN WANOP".

For more information about the Citrix SD-WAN platform editions, see the [product datasheet](#) and [product portfolio](#).

## Important

### Command Center End of Life Notification:

End of Life process for **Citrix Command Center** tool was initiated on 15-May-2017.

It is recommended that you migrate to the new management tool [NetScaler MAS](#) for your WAN Optimization deployments at the earliest.

Please refer to the articles below for the Command Center EOL calendar and associated details.

- [CTX223806 - Notice of Status Change Announcement for Citrix Command Center Software Version 5.2](#)
- [CTX223786 - FAQ: Citrix Command Center - End Of Life](#)

Citrix Command Center tool for Citrix SD-WAN WANOP edition is supported only till release 9 version 2.

Starting with the release 9 version 3, [NetScaler Management and Analytics System](#) is the management tool for Citrix SD-WAN WANOP edition appliances.

**Note**

The WANOP Edition and Standard/Enterprise Edition are separate hardware platforms running different software.

In a data center, administrators can deploy one Standard Edition and one WANOP Edition to achieve Enterprise Edition capabilities. In the branch office, administrators can choose to deploy either a Standard Edition or WANOP Edition. Alternatively, the benefits of both Standard and WANOP Editions can be accomplished by deploying a single Enterprise Edition at the branch office.
