

Configuring DigiCert

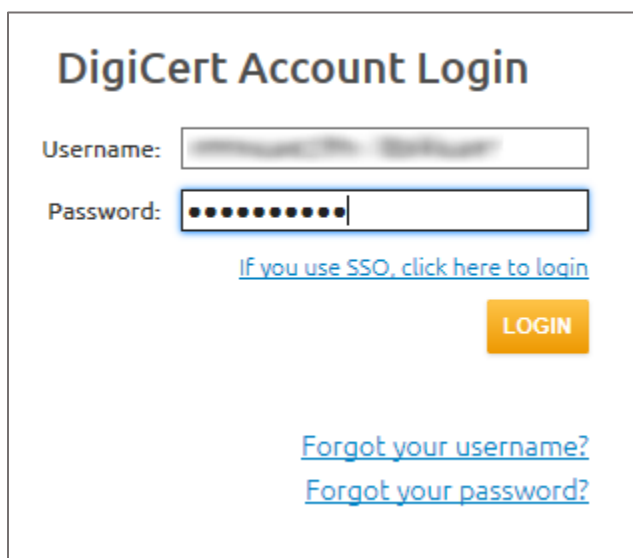

Configuring DigiCert for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to DigiCert by using the enterprise credentials.

Prerequisite

Browser Requirements: Internet Explorer 11 and above

To configure DigiCert for SSO by using SAML:

1. In a browser, type <https://www.digicert.com/> and press **Enter**.
2. Type your DigiCert admin account credentials (**Username** and **Password**) and click **LOGIN**.

DigiCert Account Login

Username:

Password:

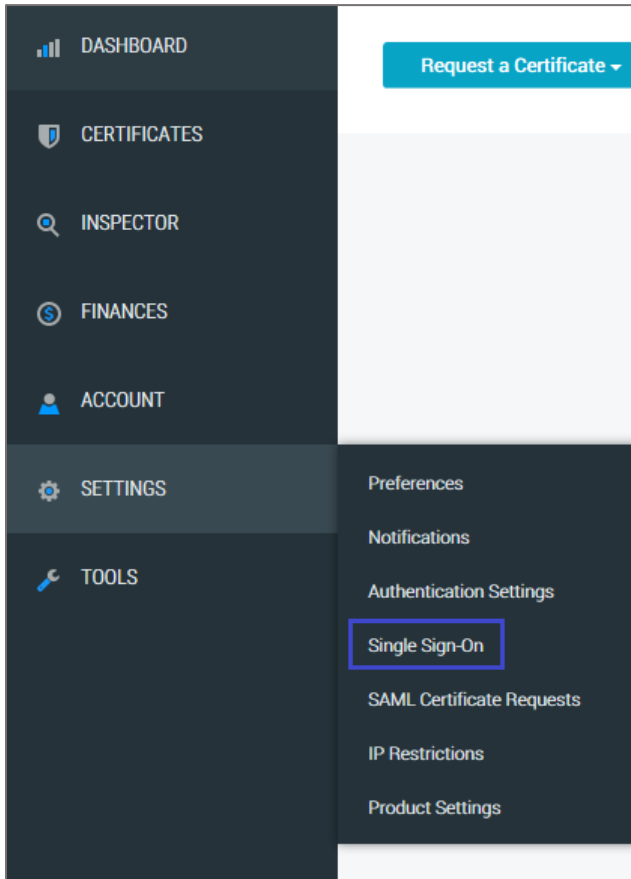

[If you use SSO, click here to login](#)

LOGIN

[Forgot your username?](#)

[Forgot your password?](#)

3. In the left panel, hover over **SETTINGS** and click **Single Sign-On**.

4. In the left panel, click **Single Sign On** and enter the values for the following fields:

Field Name	Description
How will you send data from your IDP?	Select Use a dynamic URL and paste the IdP metadata URL. The IdP metadata URL is provided by Citrix and can be accessed from the link below: https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/idp_metadata.xml
How will you identify a user?	Select NameID .
Federation Name	Organization name

Federation Settings

Your IDP's Metadata

How will you send data from your IDP?

XML Metadata
 Use a dynamic URL

https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/idp_metadata.xml

How will you identify a user?

NameID
 Use a SAML attribute

Federation Name ?

[Blurred text]

Your federation name may be visible to others who visit DigiCert's public SSO login.

Save & Finish
Cancel

5. Finally, click **Save & Finish**.
