## **Configuring Supermood**

Configuring Supermood for SSO enables administrators to manage their users using Citrix Gateway. Users can securely log on to Supermood using their enterprise credentials.

**Prerequisite**: You need to contact the Supermood support team to enable your SSO account.

To configure Supermood for SSO through SAML, follow the steps below:

- 1. In a browser, type the URL, <u>https://preprod.supermood.co/app</u> and press **Enter**.
- 2. Type your email address and click **Next**.

- ((8a	
100	
Hello	
Your omail address	
name@example.com	

Type your password and click **Next**. The Dashboard page appears.

- 3. On the Dashboard page, click **My account** in the bottom left corner. From the list, click **Single Sign On (SSO)**.
- 4. On the Single Sign On page, click **Add an SAML 2.0 configuration for an email domain**.

5. In the **Add an SAML 2.0 configuration for an email domain** section, type the following information:

Add an SAML 2.0 configuration for an email domain
To configure SAML 2.0, you only have to give us your Identity Provider's metadata, in XML format, also specify which email domains are managed by this Identity Provider
Email domain for this identity provider
En concentrations
Use a metadata URL 2
An opportunity of periods of an end of the second of
Paste XML metadata
Add Cancel

- i. **Email domain for this identity provider**: Enter your email domain.
- ii. Select **Use a metadata URL**, then enter the metadata URL.
- 6. Click Add.

Note: Signed Authentication requests are not supported by Supermood.

The SSO configuration is completed.
